To Whom It May Concern:

We are so thrilled to be in our new facility this year. I hear comments again and again from our families and from visitors about the great building. We have been able to add several extra curricular programs to our school. Enrollment grew by 10% this year and will again grow by at least that amount for next year. The building has become a real blessing to our school and to the community. We have had several community teams rent the gym for their basketball practices and have three churches using our auditorium for their meeting place each weekend.

The building process was much more than simply a construction process. DCA encouraged parental involvement in a variety of volunteer projects which helped build our sense of community and helped us save money. We have been so pleased with the Ryan GC, the general contractor, to which DCA directed us. It was wonderful to see our contractor bring in subcontractors who shared the vision and provided the school with significant savings. We were also blessed by the direction provided by DCA in reaching out to our workers. Parents and staff were involved in providing coffee, snacks, meals, and Bible study to the workers on a weekly basis. Our students were involved in making cards and singing to the workers on several occasions. DCA made it possible for us to turn our dream into a reality.

Sincerely,

David Peters
